STRUCTURED WIRING BASE HOUSE

PROVIDES: AN INFRASTRUCTURE TO SUPPORT:

- TELEPHONE OUTLETS
- TV OUTLETS (1RG-6)

THE BASE HOUSE INCLUDES THE FOLLOWING:

- STANDARD NETWORK INTERFACE PANEL, 18-INCH
 - PASSIVE CABLE TV DISTRIBUTION
 - TELEPHONE DISTRIBUTION W/ RJ45 PATCH CONNECTORS
 - BUILT-IN 110V POWER OUTLET
- TELEPHONE OUTLETS (Quantity varies by collection)
 - UPON MOVE IN, OUTLETS WILL BE CONFIGURED FOR 2 LINES.
 - NOTE: TWO-LINE SERVICE MUST BE ORDERED FROM THE PHONE COMPANY.
- TV / Cable OUTLETS (1ea RG-6) (Quantity varies by collection)

Please Note: 6 Additional phones and 1 Multi-Media outlet can be added to the Standard Structured Wiring Package. Additional modules will be required if needs exceed these specifications.

If needs exceed the above specifications, please see the Advanced Structured Wiring Package and the Deluxe Structured Wiring Package with Networking.

If a homeowner has a requirement for **more than one** computer to be connected to the broadband Internet service, the Computer Network option will be required. This option includes 4 network outlets and a 4-port 10/100-computer network hub. The Deluxe Structured Wiring Package with Networking will also support these requirements.

Upgrade Modules for Base Panel:

16 Port Telephone Module: MDT416100

This option provides the capacity to connect Sixteen (16) additional telephone outlets throughout your home.

8 Port Coax Module: MDC108

This option provides the capacity to connect eight (8) additional TV outlets throughout you home.

ADVANCED STRUCTURED WIRING PACKAGE UPGRADE TO BASE HOUSE PACKAGE

Option #95000

PROVIDES AN INFRASTRUCTURE TO SUPPORT:

- ADDITIONAL TELEPHONE OUTLETS
- ADDITIONAL MULTIMEDIA OUTLETS (CATV or Satellite)
- BROADBAND MODEM CONNECTION

THIS UPGRADE PACKAGE INCLUDES THE FOLLOWING:

- **ADVANCED NETWORK INTERFACE PANEL, 48-INCH**
 - **AMPLIFIED** CABLE TV DISTRIBUTION
 - TELEPHONE DISTRIBUTION W/ RJ45 PATCH CONNECTORS
 - PATCH MODULES FOR TELEPHONE & MULTIMEDIA OUTLETS
 - BUILT-IN 110V POWER OUTLET (by electrician)
- **6 TOTAL - TELEPHONE OUTLETS**
 - UPON MOVE IN, OUTLETS WILL BE CONFIGURED FOR 2 LINES.
NOTE: TWO-LINE SERVICE MUST BE ORDERED FROM THE PHONE COMPANY.
- **6 TOTAL - MULTIMEDIA OUTLETS (1 PHONE & DUAL RG-6 TV)**
 - BROAD BAND CABLE BOXES & SATELLITE BOXES REQUIRE CATV OUTLETS AND PHONE OUTLETS FOR PICTURE & MODEM DOWN LOAD PURPOSES. SATELLITE PROVIDERS WILL NOT ACTIVATE DECODERS UNTIL DIAL TONE IS DETECTED.
- **ONE (1) - BROADBAND COMPUTER NETWORK OUTLET**
 - THIS WILL PROVIDE INTERNET SERVICE TO **ONE** COMPUTER.
 - FOR IDENTIFICATION PURPOSES, THE WALL PLATE WILL BE TERMINATED WITH A **RED** RJ-45 INSERT.

Please Note:

The following can be added to this structured wiring package:

- **995025 Home Office Outlet (4 ea.)**
or
- **95020 Multi-Media outlets (4 additional)**
&
- **95010 Phone outlets (4 additional)**
- **95030 Computer network with Hub**
- **98505 Attic pre-wire & Conduit Package**
- **96015, 98015 Any Distributed Music Package**
- **98810 Video Camera System**
- **All Plasma or any Home Theater Option**

DELUXE STRUCTURED WIRING PACKAGE WITH NETWORKING UPGRADE TO BASE HOUSE PACKAGE

Option # 95005

PROVIDES AN INFRASTRUCTURE TO SUPPORT:

- ADDITIONAL TELEPHONE OUTLETS
- ADDITIONAL MULTIMEDIA OUTLETS (CATV or Satellite)

- **95025 Home Office Outlet (7 ea.)**
 - or
- **995020 Multi-Media outlets (7 additional)**
 - &
- **995010 Phone outlets (7 additional)**

- **95030 Computer network with Hub**
- **98505 Attic pre-wire & Conduit Package**
- **96015, 97515 Any Distributed Music Package**
- **98810 Video Camera System**
- **All Plasma or any Home Theater Option**

Additional Telecommunication Outlet

(Telephone Outlet)

Option # 95010

Description:

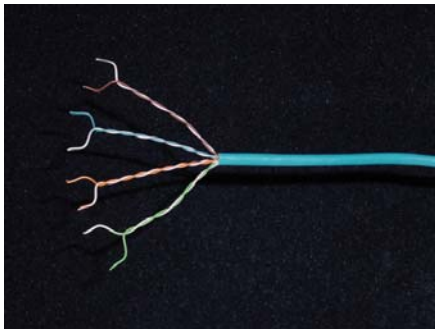

The homeowner should consider this option for standard voice lines, fax machines, or modems. To ensure optimal performance, Category 5 wiring is installed in a “Home Run” configuration rather than the traditional daisy-chained two-pair wire that has been used in new home construction. Category 5 twisted pair wiring offers significantly higher performance and flexibility and reduces the likelihood of negative effects such as cross talk, noise and static. Category 5 twisted pair wiring consists of **four (4) twisted pair wires** and therefore provides flexibility at each outlet to support up to four phone numbers. Please note, the number of outlets that can be added is based on the modules installed in the interface panel.

❖ 1 Each - “Home Run” Category 5 twisted pair wiring from selected spot

- This wire is capable of supporting 4 telephone numbers.
- Upon move in, outlet will be configured for 2 lines.

NOTE: TWO-LINE SERVICE MUST BE ORDERED FROM THE PHONE COMPANY.

- Twisted pairs offers a reduction in the chance of cross talk and static
- Ultra-High Bandwidth for passing digital signals

CAT-5

Additional Multi-Media Outlet

(Phone & TV Outlet)

Option # 95020

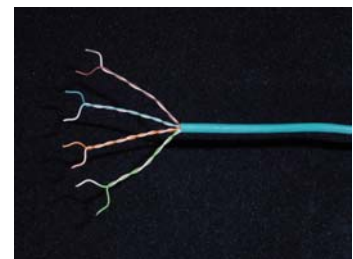

Description:

The homeowner should consider this option for all television locations. Each Multimedia outlet consists of Dual RG-6 quad shield cables and a CAT-5 cable which allows for Cable TV and Set-Top Box connections. RG-6 is a high quality video cable which can support cable TV, digital satellite, attic antennas and even HDTV broadcasts. RG-6 cable is designed to transfer digital signals to TVs without degrading the signal. By running the RG-6 cable in a “Home Run” configuration, video distribution can easily be re-configured as changes are needed. This “home run” installation method is far superior to the conventional daisy chain installations of the past.

- ❖ 1 Each – “Home Run” Dual RG-6 coaxial cable from selected spot
- ❖ 1 Each - “Home Run” Category 5 twisted pair wiring from selected spot
 - Able to pass digital signals without degradation at “high band width”
 - The way we watch television, or even communicate with one another, is changing. Digital technology as well as convergence products (Web TV for example) are combining many products into one unit. Using lower performance wire today will limit the homeowners’ ability to take advantage of current and future technologies.
 - HDTV (High-Definition Television) is broadcast in some areas today but within several years this will be the primary format network TV stations are transmitted.
 - With lower performance cable, it would be impossible to see all of the advantages of digital source material: higher resolution, sharper picture, greater depth and better sound quality. Using RG-6 wire ensures you will be ready for the future.

RG-6 quad

CAT-5

Note: in preparation for premium cable channels or satellite TV, telephone outlets must be positioned next to TV outlets. Satellite decoders have internal modems and satellite providers will not activate systems until dial tone is detected.

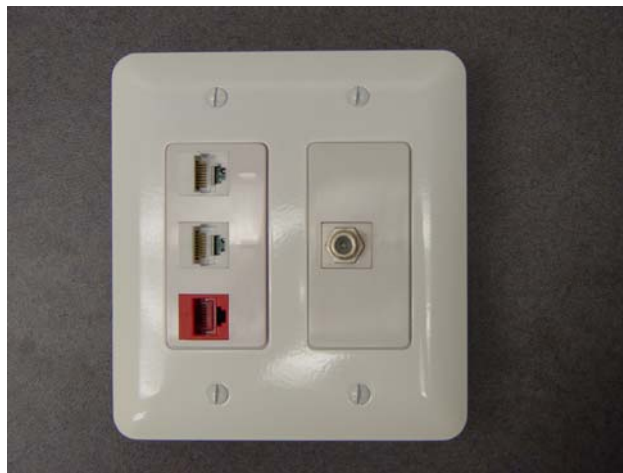

Home Office Outlet

Option # 95025

“Home Office” Workstations are designed for use by professionals, entrepreneurs, students or anyone who wants to connect with the outside world. The Home Office outlet configuration provides connectivity for all common components found at the work place including jacks for telephone, fax machine, modem and cable TV. Installed in a “Home Run” configuration, the outlet includes three CAT-5 cables and 1 Dual RG-6 Quad cable. These high performance cables increase performance while reducing cross talk and static. Homeowner’s should consider this option for rooms such as home offices, children’s bedrooms or any room where they plan to use a desktop computer or a laptop computer.

Homenet Workstations include:

- ❖ **3 “Home Run” category 5 twisted pair wire**
 - 1 Jack for Dedicated Voice Line (will support 2-line telephone)
 - 1 Jack for Dedicated Fax Line
 - 1 Jack For Dedicated Computer Modem Line (Red RJ45)
- ❖ **1 “Home Run” Dual RG-6 coaxial cable**
 - This wire is high-bandwidth cable designed to handle digital transmissions
 - RG-6 coaxial cable can be used for any of the following:
 - Cable TV
 - Digital Satellite System
 - Local Broadcast channels via an attic mounted antenna
 - HDTV (High-Definition Television)
 - Cable modem for access to the internet

Computer Network (4-locations)

Option # 95030

Description:

This is a **4-station** computer network which provides multiple users the ability to share computer resources. One advantage of this option is the elimination of a need to buy multiple printers, Internet accounts, and phone lines for modem access. Users on the network are able to share files with computers located in different rooms of the house eliminating the need to copy files onto floppy disks to use the same file on another computer. With this network system, simply log on to the appropriate computer and retrieve the files. This Computer Network option is wired with Category-5 wire which is designed for high-speed data transfer.

The Network package includes:

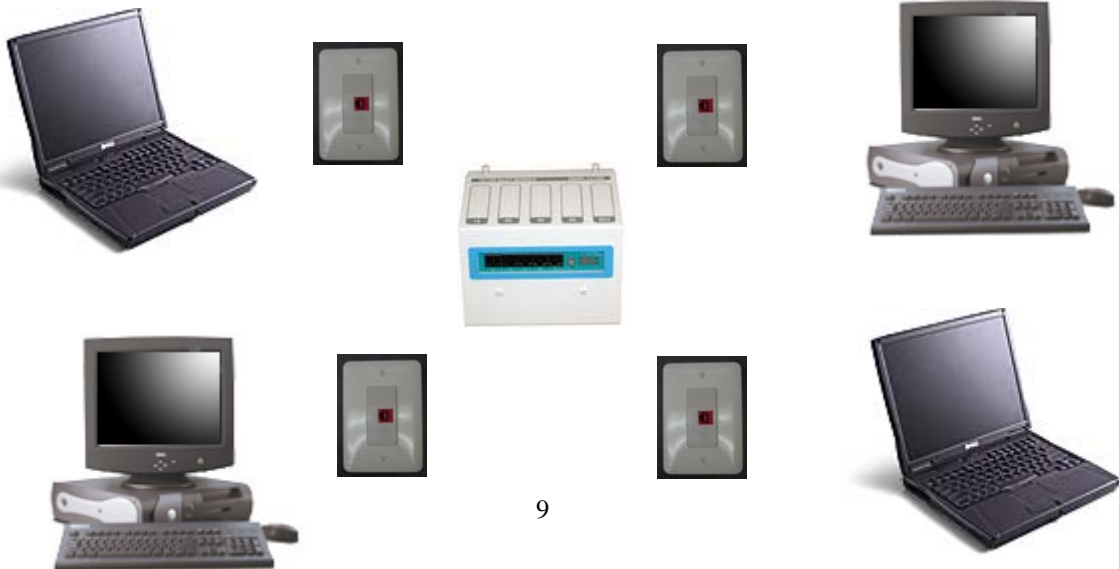

- ❖ **1 Ethernet Hub - 10/100 Base-T LAN, 4 port**
- ❖ **4 Each Computer Network outlets with RG45 “Home Run” to network interface panel with CAT 5 wire. (Red RJ-45)**

**Computers and Software not included*

❖ **Networking allows:**

- Multiple users to access a single printer
 - Saves the homeowner the cost of buying separate printers for all computers
 - Homeowner does not need a separate phone line for each computer.
- File sharing
 - Users can access files from another computer, located in a different room, simply by logging on to that computer
 - No longer will users have to copy files to a floppy disk to use them on another computer.

**Computers, Software and system configuration are not included*

Distributed Music Package

(Per Selected Location)

Option # 96015

Description:

This speaker option allows the homeowner to enjoy true musical reproduction throughout the house. The speakers should be considered on a per room basis. The cosmetic and functional designs of these in-ceiling speakers provide a very clean look with no exposed wires and are aesthetically pleasing in any décor. The professional installers' placement of these architectural series speakers will provide even distribution of music in any room. Featuring a volume control in each room, speaker volume can be adjusted or turned off independently of other rooms. All speakers will be "Home Run" to a central Audio Home Run Point. This Audio Home Run Point, a location designated by the homeowner, is where the homeowner will connect their stereo equipment. High-efficiency design specifications and ultra-flat frequency response make these speakers ideal for listeners all of types of music.

Note: This option is not designed to add speakers to a "Whole House" or "Advanced Multi-Zone System."

❖ **Architectural In-Ceiling Speakers** -Ideal for interior room where stereo sound is desired.

Consists of:

- 1 pair Elan ME650C 6 1/2 inch in-ceiling speakers
- 1 each Elan Stereo in wall volume control
- 1 each Audio Home Run Point (To be selected by purchaser)

❖ **Exterior Speakers** -Ideal for outdoor patio or deck

Consists of:

- 1 pair Energy Tempest outdoor speakers
- 1 each Elan Stereo in wall volume control
- 1 each Audio Home Run Point (To be selected by purchaser)

❖ All speaker wiring is Home Run to purchaser's specified Audio Home Run point and terminated for easy hook up to homebuyers audio equipment.

❖ Distributed audio provides high quality music throughout the house.

❖ Volume control in each room. Allows volume to be adjusted or turned off independently of other rooms.

Audio and Communication System

Option # 97510

Description:

This system, a collection of some of the industries leading edge equipment, allows the homeowner to have *high performance audio in three locations of the house*. The source of the music can be chosen by simply touching a button on either of the *two (2) in-wall keypads* and instantly your selection is playing throughout the home. Each of the *three (3) rooms of speakers* has an *independent volume control* to allow for precise adjustment of the music's volume. This system also has the ability to *interface with the front door call box and existing telephones*. When the button on the brass front door call box is depressed, the audio system is automatically muted and the doorbell chime can be heard through each of the 3 pairs of speakers. Using any telephone in the home, this technology enables the homeowner to talk with the person at the front door. An additional feature of this system is *audio muting*. If the telephone rings while the audio is playing, the system automatically mutes the volume of the audio system. Finally, this system provides *intercom capability* by integrating the phone in the house with this distributed audio system. By simply picking up any phone in the home and pushing # followed by 7, you can page throughout the houses in-ceiling speakers. This option package is a clearly a dramatic improvement over conventional approaches to distributed audio, with "better than intercom" whole-house communications.

Package includes:

- ❖ **1 Elan AVEC system**
- ❖ **2 Elan Z100 in-wall keypad**
 - Provides "one touch" system control (select source, turn on system, select disc.)
- ❖ **6 (3 Pairs) Elan ME650C 6½ inch in-ceiling speakers**
 - Architectural speakers featuring extended frequency response & high power handling
- ❖ **3 Elan stereo in-wall volume controls**
 - Volume in each room can be independently adjusted or turned completely off
- ❖ **1 Elan DSRB front door call box with DS1500 door speaker**
 - Provides two-way communication with the front door using any touch tone telephone
- ❖ **1 Elan AA13010 input music wall plate, mounted at purchasers specified location**
 - This input wall plate is the interface between the homeowner's stereo equipment and the whole house audio system. (Audio Home Run Point)
 - Stereo Receiver
 - Tape deck
 - CD player, etc.

Note: This system includes a provision for additional amplification needs if, in the future, additional speaker locations and/or higher listening levels for current speakers are desired.

Music input Wall Plate
(Specify Location)

Includes 2 keypads
Typically installed
In the kitchen &
Master Bedroom

Front Door Call Box

Additional pair of speakers for Whole House Audio & Communications System

Option # 97515

Description:

This option provides the homeowner the ability to **add pairs of speakers** (up to three (3) additional pairs of speakers) to the Whole House Audio & Communications System package. With the integration of the stereo **Override** volume control, these additional rooms can interface with the front door call box as well as the existing telephones in the house. For more detailed information, please see the description for the primary whole house audio & communications package.

Package includes:

- ❖ **2 Elan (1 pair) ME650C 6 ½ inch in-ceiling speakers**
 - Architectural speakers featuring extended frequency response & high power handling
- ❖ **1 Elan override stereo in-wall volume control**
 - Volume in each room can be independently adjusted or turned completely off
 - 12 step volume increments
 - This unique volume control provides paging and door chime override features.

Note: This system includes a provision for additional amplification needs if, in the future, additional speaker locations and/or higher listening levels for current speakers is desired.

Advanced Multi-Zone Audio & Communications System

(6 Zone / 6 Room / 6 Source)

Option # 98015

Description:

This advanced Multi-Zone Audio & Communications System provides the homeowner with great *sonic performance in 6 rooms of the house*. The system's unique zoning allows the homeowner to simultaneously listen to *6 different sources* throughout the house. For example, in one room you can listen to a CD; another room's speakers can be heard playing a tape, and a third room's speakers can be heard playing the radio, etc. Included with this system is a *Sony 400-disc CD player* and a high performance *AM/FM Tuner* which with integration to the system's *direct access companion keypads* allow the homeowner to manage their collection of music CDs or tune a station on the radio. Additionally, within each zone, the homeowner can select an audio source as well as command common control functions such as play, fast forward, rewind, etc. The direct access companion keypads expand the capabilities allowing access to tuner stations, CD discs in a carousel or jukebox, DSS or even cable box channels. In-ceiling stereo speakers provide high-quality listening in each zone. The cosmetic and functional designs of these in-ceiling speakers provide a very clean look with no exposed wires and are aesthetically pleasing in any décor. The professional installers' placement of these architectural series speakers will provide even distribution of music in any room.

This system has the ability to *interface with the front door call box and existing telephones*. When the button on brass front door call box is depressed, the audio system is automatically muted and the doorbell chime can be heard through each of the 6 pairs of speakers. Using any telephone in the home, this technology enables the homeowner to talk with the person at the front door. An additional feature of this system is *audio muting*. If the telephone rings while the audio is playing, the system automatically mutes the volume of the audio system. Finally, this system provides *intercom capability* by integrating the phone in the house with this distributed audio system. By simply picking up any phone and pushing # followed by 7, you can page throughout the house using the system's in-ceiling speakers. This option package is a clear and dramatic improvement over conventional approaches to distributed audio, with "better than intercom" whole-house communications.

Package includes:

- ❖ 1 Sony CDPCX455 400 Disc CD Management Player
- ❖ 1 Parasound Z-TUNER AM/FM Tuner
- ❖ 1 Elan System 6 Integrated Multi-Zone Controller (6 zone controller)
- ❖ 1 Elan COMM2 Communications Controller
- ❖ 1 Panamax MAX4300 surge / line conditioner
- ❖ 6 Elan OLE film interactive in-wall touch panel
 - Provides "one touch" system control (select source, turn on system, select disc..)
- ❖ 12 (6 pairs) Elan ME650C 6 ½ inch ceiling speakers
 - Architectural speakers featuring extended frequency response & high power handling
- ❖ 1 Elan DSRB front door call box with DS1500 door speaker and DS20 brass plate
 - Provides two-way communication with the front door using any touch tone telephone
- ❖ Custom In-wall Equipment Cabinet with glass door

VIA! Color Touch Screen System Controller with Video Switcher

Option # 98020

Option # 98025 *Additional VIA! Color Touch Screen Controller*

Description:

The award-winning **VIA!** graphical user interface is a full-color LCD touch panel that can control audio and video components and whole house audio systems. The **VIA!** is also a high-quality color monitor that allows you to view video sources such as cable TV, satellite TV and closed circuit TV cameras. The **VIA!** panel is flush-mounted in the wall exhibiting a very clean, finished look while its 6.4" wide screen allows for large, user-friendly graphics and eliminates the need to scroll through numerous pages to control A/V components. The companion component Z-880 high-performance composite video switcher is one of the most versatile high-performance composite video switchers on the market today and can be used to access any A/V source from any zone. When combined with the Z-880, **VIA!** Touch Panels allow you to view up to eight video sources on each **VIA!** panel!

VIA DJ Digital Music Server

160 Gigabyte Hard Drive

Option # 98030

Description:

VIA!DJ is a digital audio storage and music management system with a *160 gigabyte hard drive* that gives you instant access to all your music from any **VIA!** Touch Panel. With three discrete pairs of audio outputs, having one **VIA!** DJ is like having three separate CD changers- each one capable of independently playing any song from you entire music collection - instantly!

Navigation is easy and intuitive with the large full-color graphics touch panel display. View the cover art of each CD, select music by artist name, CD title or song title, or select to listen to entire genres of music. Make your own play lists! Play back any CD, play list or genre randomly or sequentially - and do it all from anywhere you have a **VIA!** Touch Panel!

VIA! DJ's CD-ROM drive allows you to record CD's at up to four times normal speed and listen to previously recorded music during the recording process. A built-in modem dials up on-line music information services, automatically downloads cover art and song lists. Data can also be downloaded to the **VIA! DJ** using a DSL or cable modem connection to a Home Network system. MP3 audio can be recorded in this fashion and added to your music collection.

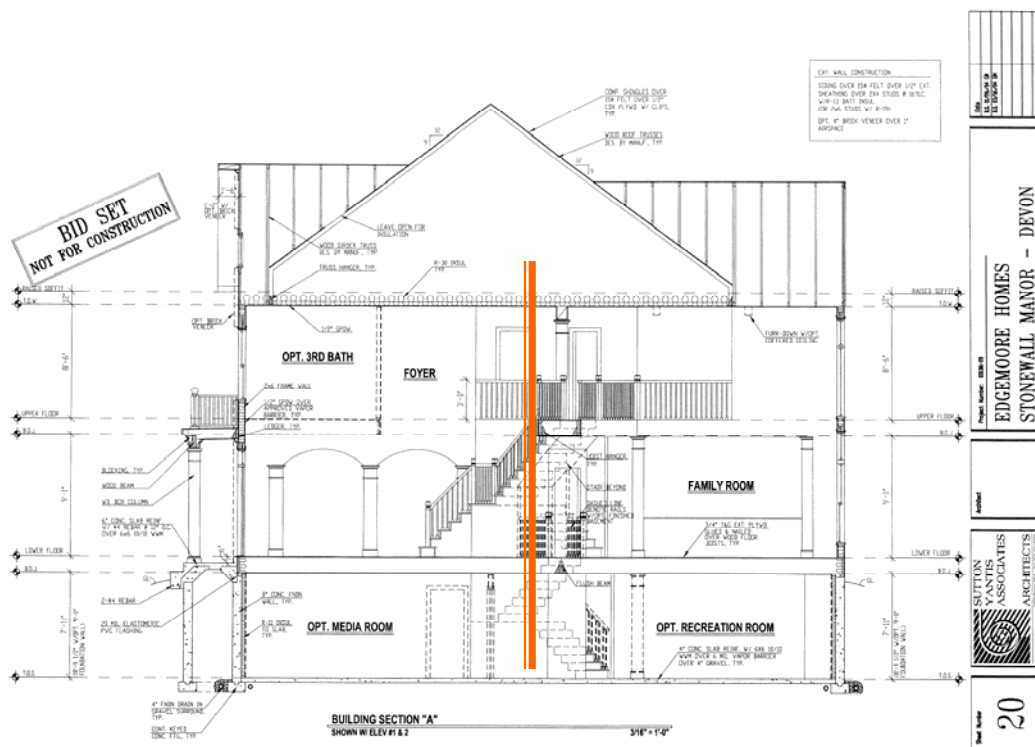

Note: Conversion of homeowner's current CD collection is not included with this package. The conversion of current CD collections can be done post settlement. See Audio Buys for details.

Conduit with Pull String From Attic to Structured Wiring Panel

Option # 98500

1½” flex conduit is installed from the network interface panel to the attic. A pull string will be installed in the conduit. This will provide assistance when additional cables need to be run to the upper level of your home. With today’s changing technology, this option provides a solution for retrofitting wiring or adding to the systems already installed in your home.

Attic Pre-wire for Satellite Dish & HDTV Antenna

Option # 998505

Description:

Spare TV & Telephone wiring run to attic for future application (i.e. satellite or antenna). This option allows for the future installation of High Definition TV, satellite dish as well as a High Definition Local Antenna. Five (5) RG-6 cables and one (1) Cat-5 wire are routed from the interface panel to the attic. This pre-wire planning package can help prevent costly drywall repair and expensive installation costs. Additionally, this option could significantly reduce the need to install wires on the outside of the home.

Package includes:

5 each RG6 Quad Shield Cables

1 each CAT-5 Cable

Flat Panel TV Pre-Wire (Unterminated)

Option # 98610

This option provides wiring to a location designated by the homeowner for the future installation of a Plasma TV or LCD TV wall mounted display.

Package includes:

- 1each 5-strand RGB Cable
- 1each HDMI Cable
- 1each Control Wire for future remote eye system

Please note:

A multi-media outlet must be located at the equipment location.

Future plasma TV and equipment locations must be clearly noted on the floor plan diagrams.

**DISCLAIMER: THE ABOVE PICTURE IS FOR ILLUSTRATION PURPOSES ONLY.
NO EQUIPMENT IS INCLUDED IN THIS PACKAGE**

Plasma Pioneer Elite 42-Inch HDTV Display Plasma Pioneer Elite 50-Inch HDTV Display

Option # 98620	Pioneer 42-Inch Plasma HDTV	\$TBD
Option # 98630	Pioneer 50-Inch Plasma HDTV	\$TBD

Description:

Enjoy the high tech, thin profile presence that plasma TV can bring to your new home. These HDTV upgradeable displays are ideal for bedrooms, family rooms, walls above fireplaces or any place where space for a standard TV may be an issue. Plasma TV's display images with such clarity and depth it makes you feel as if you are part the action. Get the best new technology to hit the market since the VCR and DVD! The stunning ultra-slim, semi-floating glass panel design of these TV's allows them to be hung on a wall as if they were a piece of art.

DISCLAIMER: THE ABOVE PICTURE IS FOR ILLUSTRATION PURPOSES ONLY.
SURROUND SOUND SPEAKERS CAN BE ADDED BY CHOOSING OPTION #99015

Video Camera System

Ideal for Front Door Surveillance
or
Video Monitor in Infant Rooms & Play Rooms

Option # 98810

Description:

External surveillance cameras mounted on the outside of a home, such as above a front or back door, allows for TV viewing of camera monitored areas and adds an increased measure of security to any home. This camera is an unobtrusive ball style camera that is capable of monitoring a fairly large area. When used with the communication system, homeowners can see and talk to someone at the front door without getting out of bed or favorite chair. Additional cameras can also be placed in many areas of the home including such areas as near a [baby's crib](#) or [in a playroom](#), and its monitored image can be viewed on any television in the house by simply tuning to a pre-determined channel.

Package includes:

- ❖ 1 GBC BC450 ball style camera
- ❖ 1 Digital modulator
 - The camera can be viewed on all TV's in the house
 - See who is at the front door without actually opening it
 - Provides an extra sense of security to the homeowner

5.1 Home Theater Pre-Wire

Option # 99010

Plug in your **existing** equipment and speakers and experience the magic of home theater! The wall plates in this package provide easy connection and a finishing touch to home theater speaker connections.

Package includes:

- Single Room wired to accommodate (5) speakers and (1) subwoofer, Dolby Digital Surround Sound.
- (1) Home Theater wall plate for speaker connection to future surround sound receiver.
- (4) Single speaker wall plates for Front & Rear speakers.
- (1) RCA-to-RCA Subwoofer Connection Plates. For future powered subwoofer.

Home Theater “Ready” System

5 Speaker Surround Sound w/ Sub Pre-wire

Option # 99015

Plug your existing surround sound equipment into this system and experience the magic of home theater without having **big box** speakers in your room.

Package includes:

- Single Room wired to accommodate (5) speakers and (1) subwoofer, Dolby Digital Surround Sound
- (5) Paradigm AMS-250 **In-Wall/Ceiling** Speakers (Front, Center & Rear Speakers)
- Architectural speakers featuring extended frequency response & high power handling.
- (1) 4-pair Speaker plate for Speaker Connection to future Surround Sound receiver
- (1) RCA-to-RCA Subwoofer Connection Plates. For future powered subwoofer.

Home Theater System with 60" HDTV Upgradeable TV

(LCD Rear Projection Technology)

Option # 99020

Description:

This option is designed to bring the Movie Theater Experience into your own home. By using high performance electronics and speakers, this system will recreate the experience that the film director wanted for the viewer to hear. This system includes a 60-inch Sony LCD rear projection HDTV, 5 voice matched speakers (left, center, right and two rears), an amplified subwoofer, and a Digital Dolby, DTS Surround Sound Receiver. This system not only sounds great, but also looks great. All of the components are housed in custom-built equipment cabinets with glass doors. In addition, the TV is flushed in the wall, exposing only the screen. This approach eliminates exposed wires creating a very clean, finished appearance. This option is ideal for anyone who enjoys watching movies, sports, or even standard network programs.

Package includes:

- ❖ 2 custom equipment cabinets with glass door & trim
- ❖ 1 Sony Rear Projection LCD Television "HDTV upgradeable"
 - Sony KDS60A3000 60" LCD TV
- ❖ 5 Paradigm AMS250 In-Wall, Dolby Digital, architectural speaker (3 front & 2 rear)
- ❖ 1 Sunfire HRS10 Powered Subwoofer
- ❖ 1 Denon AVR1908 Dolby Digital / AC-3 surround sound receiver
- ❖ 1 Denon DVD1940 Progressive Scan DVD player
- ❖ 1 Panamax MAX4300EX Surge / Line conditioner
- ❖ 1VHF/UHF attic-mounted antenna system
- ❖ Wiring, installation and training (in home orientation with purchaser).

60-Inch Television

Cinema Room with 110” HDTV Upgradeable Front Projection TV

Option # 99510

Description:

This option provides the ultimate in Home Theater Entertainment. The foundation of the screening room is a *110-inch wall mounted screen* and a *Sony LCD ceiling mounted front projection TV*. Complimenting this movie theater like presentation is a Digital Dolby surround sound system. It includes an *AC-3 / DTS Receiver*, *7 voice matched architectural in-wall speakers* (left, center, right, sides, rears), and a *powered subwoofer*. The professional customized installation maximizes the room’s acoustics. The systems custom equipment rack is recessed in the wall creating an ultra sleek appearance while hiding all cables and wires, a common occurrence with standard systems. This *screening room* is ideal for anyone who enjoys watching movies, sports events, or even just standard network programs.

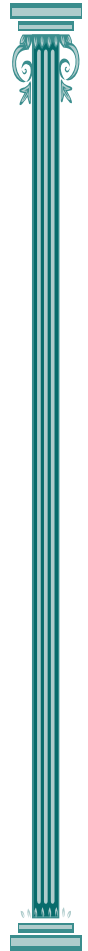

Package includes:

- ❖ 1 Sony LCD Front Projector “HDTV Upgradeable”
- ❖ 1 Sony Ceiling Mount
- ❖ 1 110 -Inch Wall Mount Screen with Black Frame
- ❖ 1 Denon AVR2808CI 7.1 AC-3 / DTS Surround Sound Receiver
- ❖ 1 Denon DVD1940CI Progressive Scan DVD Player
- ❖ 1 Panamax MAX4300EX Surge / Line Conditioner
- ❖ 7 Paradigm AMS250 In-Wall, Dolby Digital, architectural speakers
- ❖ 1 Sunfire True subwoofer Solitaire 10 Powered Subwoofer
- ❖ 1 MX900 System Controller
- ❖ 1 Custom Equipment Rack with Glass Door
- ❖ Wire, Cables, Installation and programming for these devices
